RestedXP is the speediest leveling guide for WoW Classic, made by pro speedrunners. The guides fit each class perfectly and can be used with a free addon inside the game. You can find them all on Guidelime. To get started, download the zip file from this page, then copy the *Guidelime* folder into your Addons folder. This way, you'll always have the latest version. Alternatively, you can install it via CurseForge or an addon manager for the most recent stable release. For guides, visit the list of available ones on Guidelime. To install a guide, follow the same steps as installing any other addon: copy the guide's folder into your Addons folder, just like with *Guidelime*. You can also use CurseForge or another addon manager to install a guide. If you want more guides, create your own and contact me! The addon is currently in English, German, French, Russian, and Chinese. If you'd like to help with translations for other languages, let me know! If you accidentally closed the window, type `\\lme` or go to Interface Options > AddOns > Guideline > Options and click 'show window'. For more questions, check out the FAQ on this page.
